

IDEAL APPLICATIONS

- Kitchens
- Patios
- Warehouses
- Museums
- Retail Stores
- Restaurants
- Shopping Malls
- Garages
- Distributions Centers
- Decorative Concrete

ENHANCEMENT AND PROTECTION

The use of BELLATRIX on a previously sealed concrete surface will:

- Enhanced Shine – Polished and decorative surfaces will be enhanced.
- Enhanced Color – Used over a stained and sealed surface, BELLATRIX will enhance the color, creating a glossy, protected surface. BELLATRIX will also lock in the color, so the color won't bleed or track after application.
- Stain-Resistance – Surfaces which will be exposed to stains will be protected and will feature easier cleanup.
- Toughness – BELLATRIX will increase the abrasion resistance and durability of your floor. This sustainable surface will resist damage caused by everyday use.
- Hardness – BELLATRIX will create a finished surface that has superior hardness qualities when compared to a floor that has only been treated with a densifier or acrylic sealer.

BELLATRIX®
PERFORMANCE ENHANCER

W. R. MEADOWS®
SEA TIGHT®

BELLATRIX

*ENHANCE, REJUVENATE, AND PROTECT
YOUR CONCRETE FLOOR WITH BELLATRIX.
FROM W. R. MEADOWS.*

BELLATRIX FROM W. R. MEADOWS IS A PREMIUM CONCRETE ENHANCER, DESIGNED FOR USE OVER SEALED OR HARDENED SURFACES.

BELLATRIX is formulated using dual-protection technology combined with unique hybrid polymers, to offer the ultimate in concrete protection. Proprietary, dual-action technology provides the ultimate in both penetrating and film-forming concrete protection. BELLATRIX offers environmentally friendly, VOC-compliant protection, which provides increased stain suspension and resistance against most contaminants found in kitchens, retail food stores, restaurants, malls, garages, warehouses, distribution centers, etc.

BELLATRIX is a unique, diversified product that can be used in a multitude of applications. The common element that BELLATRIX provides in these various applications is performance enhancement and protection. For decorative concrete surfaces, polished concrete, previously hardened concrete, and concrete renovation, you need a surface that has unmatched protection, as well as the aesthetic qualities of gloss and shine. BELLATRIX provides these unique properties.

POLISHED CONCRETE

BELLATRIX may be applied over concrete that has

been previously treated with a densifier/hardener, such as LIQUI-HARD® and LIQUI-HARD ULTRA, and/or polished with a system like INDUROSHINE®.

REJUVENATION

BELLATRIX can be used on new and existing floors. It's perfect for previously sealed new concrete floors, or rejuvenating an old, previously sealed concrete floor. BELLATRIX is a key ingredient in all concrete renovation projects. The product works in tandem with the hardener/sealer base, enhancing the products' performance aspects. BELLATRIX makes old concrete look new again, when used over previously sealed surfaces.

DECORATIVE CONCRETE

BELLATRIX is a must in all decorative concrete applications. Of course, decorative concrete is used in applications where aesthetics are valued. With BELLATRIX, the aesthetic qualities of the acid-stained or colored concrete are enhanced. You get a glossier finish and brighter colors when BELLATRIX is used with the appropriate sealer. Also, the decorative concrete's

performance becomes unmatched, as BELLATRIX hardens, toughens, and makes the surface more durable. This makes your concrete patio, retail environment, walkways, etc., much more eye pleasing and inviting. Also, the surface is stain-resistant, resisting stains caused by food, drinks, wine, etc., which is an important factor in nearly all decorative concrete applications.

When it has to be absolutely tough enough, choose BELLATRIX. The multiple uses of BELLATRIX make the product diversified and flexible for several different applications. BELLATRIX can also be used with the entire line of W. R. MEADOWS curing and sealing products, as well as LIQUI-HARD and LIQUI-HARD ULTRA concrete densifier and chemical hardener and the INDUROSHINE polished concrete system.
