

CRISTALLUM

Resin-Based, Water Emulsion Concrete Curing Compound

**Clear, non-yellowing
water-based concrete
curing compound**

Designed for
curing concrete in
high-end concrete
applications where
visual appearance
during the curing
period is a priority.

CRISTALLUM is a clear, water-based, dissipating concrete curing compound formulated for use on interior, exterior, vertical, and horizontal concrete surfaces.

Once applied, CRISTALLUM forms a premium-grade membrane that retains an optimum amount of water in freshly placed concrete for proper hydration of the concrete.

CRISTALLUM fills a critical performance gap in curing compounds for high-end concrete applications where visual appearance during the curing period is a priority.

- When properly applied, CRISTALLUM produces a premium-grade film, which optimizes water retention.
- CRISTALLUM dries to a clear, non-yellowing film.
- Furnished as a ready-to-use, true water-based compound.
- Produces hard, dense concrete ... minimizes hair checking, thermal cracking, dusting, and other defects.
- Offers a compressive strength significantly greater than improperly cured or uncured concrete.
- Increases tensile strength for greater resistance to cracking and surface crazing.
