

LIQUI-HARD®

*Polished floor application

LIQUI-HARD is a premier densifier and chemical hardener designed for ultimate hardening and dustproofing of concrete.

*Polished floor application

*Polished floor application

LIQUI-HARD penetrates progressively through the concrete surface and converts the weak calcium hydroxide and other available calcium ions into calcium silicate hydrate, producing a hard, dense surface.

LIQUI-HARD concrete densifier and chemical hardener compound is a proprietary, water-based, ready-to-use, clear silicate liquid, formulated with chemically reactive raw materials to harden and dustproof concrete. This waterborne solution, when properly applied, offers substantial improvement in abrasion and chemical resistance and will significantly improve the durability of the concrete surface when compared to untreated concrete.

LIQUI-HARD is recommended for use wherever hardened, dustproofed, and improved chemical- and abrasion-resistant surfaces are required. Ideal applications include floors in industrial plants and warehouses, storage silos, sewage plants, chemical processing facilities, refineries, and heavy pedestrian floor traffic areas, such as civic centers, sports arenas, stadiums, hospitals, airports, museums, retail, and big box stores.

LIQUI-HARD features and benefits include:

- Penetrates deeply into concrete to densify and harden surfaces to help reduce entry of moisture and other foreign matter.
- Dustproofs and improves chemical and abrasion resistance of treated surfaces when compared to untreated concrete.
- Provides a permanent sheen with the ability to polish.
- Compatible with INDUROSHINE® concrete polishing system from W. R. MEADOWS.
- LIQUI-HARD ULTRA available for projects requiring faster and more efficient application.
