

MEL-DEK™

Deck Waterproofing System

Roll-type 65-mils thick polymeric waterproofing membrane on a shrink-resistant, heavy-duty, polypropylene woven carrier fabric

MEL-DEK waterproofing system provides an excellent waterproofing membrane for bridges, parking decks or other vehicular traffic structures to be overlaid with an asphalt concrete wearing course.

MEL-DEK is a roll-type waterproofing membrane that is 65 mils thick, composed of a polymeric waterproofing membrane on a shrink-resistant, heavy-duty, polypropylene woven carrier fabric. The two components are laminated together under strictly controlled production procedures. MEL-DEK is ideal for repair, maintenance, or new construction applications.

FEATURES/BENEFITS

- Requires no protection ... can withstand the dynamic placement of hot asphalt overlays.
- Provides 3/4" (19.1 mm) membrane-to-membrane weld at seams for positive, monolithic protection.
- Flexible, dependable, cost-effective, easy to install.
- Meets a wide range of maintenance and new construction application needs.
