MEADOW-PATCH SMOOTH-GRADE is a single-component, polymer-modified, cement-based, sands-free material used for achieving an ultra-smooth finish on precast, cast-in-place, tilt-up or other unfinished concrete surfaces. This product offers superior adhesion and durability. It is not a vapor barrier, contains no added gypsum, has excellent workability for trowel application, and has an extended pot life for enhanced working time.

MEADOW-PATCH SMOOTH-GRADE is an ideal choice for smoothing rough surfaces, repairing honeycombs, and dressing up bug holes or other small surface defects.

FEATURES/BENEFITS:

- Smooth consistency
- Extended working time; up to 45 minutes at 75° F (23.9° C)
- For interior, exterior, below-, above-, and on-grade surfaces
- Easy to re-temper without having to add water
- Offers an aesthetically-pleasing finished look
