

# PRECON<sup>®</sup>

## Pre-Applied/Underslab Waterproofing Membrane

A cost-effective, fully bonded solution for blindside or pre-applied waterproofing applications

Waterproofing is not a one-size-fits-all proposition. That's why **W. R. MEADOWS** offers an entire family of products to address different requirements – including **PRECON**, a cost-effective solution for difficult blindside or pre-applied applications.

**PRECON** is comprised of a non-woven fabric, elastomeric membrane and **W. R. MEADOWS'** exclusive, patented plasmatic core (U.S. Patent No. 7,179,761). The plasmatic core is a seven-layer matrix designed for toughness and provides the lowest water vapor transmission (WVT) rating on the market. Designed to provide a waterproof seal between the membrane and poured concrete, **PRECON** also:

- Acts as a barrier against termites.
- Reduces methane and radon gas intrusion.
- Forms a mechanical bond between the membrane and the concrete as it cures.
- Serves as a blindside membrane in vertical applications where access to the positive side is limited.
- May be used for horizontal applications for underslab waterproofing and vaporproofing.
