Turn Your Old Tired Floor Into a New Work of Art

Ideal applications:
- Residential and Commercial Applications
- Floor Rehab
- Walkways
- Concrete Floors
- Restaurants
- Galleries
- Museums
- Offices

Whatever your needs... we have the solution.

Distributed by:
Turn your old floor into a new work of art with **FLOOR-TOP STG** from W. R. MEADOWS.

**FLOOR-TOP STG** is a standard traffic-grade, single-component, shrinkage-compensated, self-leveling floor topping and premium underlayment that may be pumped or poured. **FLOOR-TOP STG** is specially designed to smooth out uneven, rough or minor deteriorated interior concrete floors.

This product is ideal for smoothing and leveling concrete and rigid-based interior substrates, either before the application of a floor covering, or as a finished floor. **FLOOR-TOP STG** cures to a hard, traffic-wearing surface suitable for foot and light rubber-wheeled traffic. **FLOOR-TOP STG** may be color enhanced with an inorganic liquid tint, topical coating or acid stain.

The light grey color of **FLOOR-TOP** is an ideal canvas for liquid tints, topical coatings, and acid stains or dyes. Create a finished, decorative floor that is only limited by your creativity. This ability to rehabilitate and also enhance the aesthetic look of the finished floor creates a one-two punch. Not only fix, but also make the floor look better than the original.

**Features and Benefits**

- Light grey color.
- May be applied up to 1" (25.4 mm) thick in a single application.
- Single-component; only requires addition of water.
- Superior flow – may be poured or pumped.
- Self-leveling properties reduce labor costs.
- Specialized polymer formulation readily accepts stains and color.
- Accepts early foot traffic (four hours).
- Floor covering may be installed in as little as 18 hours.
- May be used with radiant heating floor systems.

**Application Made Easy**

Installing **FLOOR-TOP STG** is easy. The product is self-leveling, so no labor intensive troweling is needed. Just prime the floor, then place **FLOOR-TOP STG** onto the substrate and screed with a gauge rack. On some floor substrates, an epoxy primer could be used to further aid in adhesion. **FLOOR-TOP STG** may be sanded to achieve the desired final appearance. Please read our data sheet, available at www.wrmeadows.com, for full application instructions.

A floor finished with **FLOOR-TOP STG** creates a rehabilitated, aesthetically pleasing surface.

**Durability ThatLasts**

A floor finished with **FLOOR-TOP STG** looks great, and is only matched by its exceptional durability. You want this unique, restored, decorative floor to keep up, and with **FLOOR-TOP STG**, it will. This finished floor, once hardened, will be suitable for foot and light rubber-wheeled traffic. A residential and commercial interior application, where foot traffic is standard, is a perfect and safe application.
