

The **INDUROSHINE SYSTEM** is recommended for use wherever a dense, wear resistant, architecturally pleasing low maintenance floor is desired.

INDUROSHINE®

The Art of Polished Concrete ... Designed to Last.

Ideal applications:

- Warehouses
- Schools
- Retail
- Civic centers
- Sports arenas
- Stadiums
- Hospitals
- Airports
- Museums

If you need more information about how our products can help you protect your investment, here are four quick and easy access points:

Whatever your needs...
we have the solution.

INDUROSHINE

780 PRO

Concrete is the most commonly used building material in the world. It is designed to be tough, durable, practical and sustainable. Some would consider concrete's inherent strengths to also be its architectural weakness ... until now.

The **INDUROSHINE** system allows you to specify the Polished ... Densified ... Surface (PDS) that you and your client want.

What sets the **INDUROSHINE** system apart from the competition is the equipment and diamond grinding tools from our network of approved applicators combined with the best densifier and hardener on the market, **W. R. MEADOWS LIQUI-HARD®**. The combination allows you to specify and achieve unsurpassed results on your grinding and polishing applications.

If you want a low maintenance ... durable ... architecturally pleasing floor ... specify **INDUROSHINE**.

INDUROSHINE is an environmentally friendly, jobsite friendly flooring system that combines green concrete grinding and polishing equipment with **LIQUI-HARD 0.0 g/L** VOC-compliant densifier and sealer from **W. R. MEADOWS**. This provides owners and specifiers with the best polished concrete system on the market. Durability that lasts!

The SYSTEM

Specify the look you want. (You can view **INDUROSHINE** guide specifications for application procedures at www.wrmeadows.com)

INDUROSHINE PDS-1
Satin finish that will reflect images from side lighting.

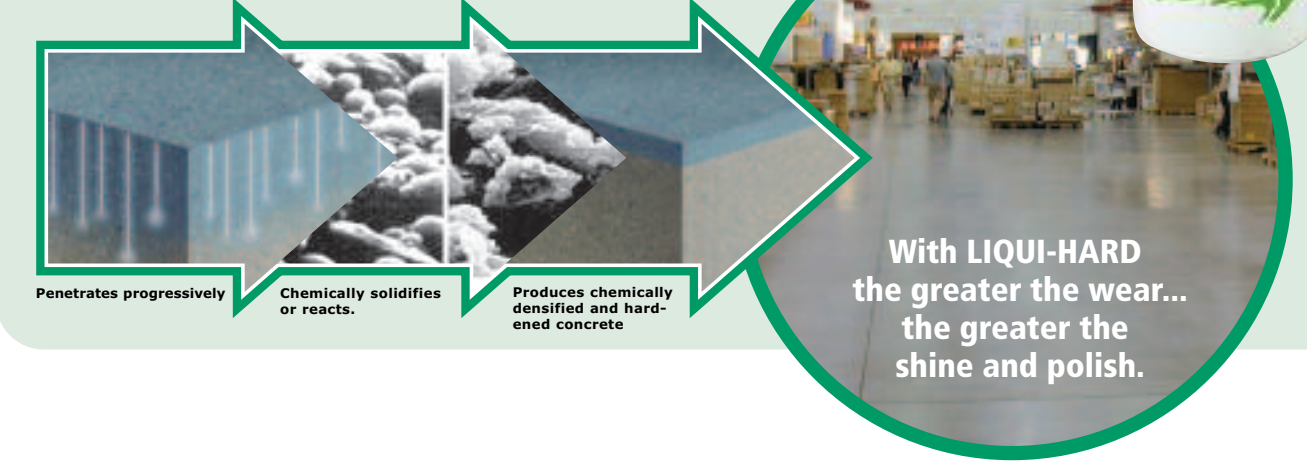

INDUROSHINE PDS-2
Semi-gloss finish that will reflect overhead and side images from 35-45 feet with increased light reflectivity.

INDUROSHINE PDS-3
High-gloss finish that will look wet and show mirror like reflections of side and overhead images.

The DENSIFIER

LIQUI-HARD is a waterborne concrete densifier and chemical hardening compound. It is a ready-to-use, colorless liquid, consisting of proprietary active chemicals that deeply penetrate the surface of concrete. When applied properly, **LIQUI-HARD** will significantly improve the durability of the concrete surface. As **LIQUI-HARD** is applied and penetrates into the concrete surface, a chemical reaction takes place, producing a byproduct that fills in the pores of the concrete. This process produces a substantially denser concrete surface with enhanced durability. This unique blend of chemically reactive ingredients provides the highest level of protection for your concrete. Ask us for independent test results today.

ADDITIONAL PRODUCTS:

BELLATRIX is formulated using dual-protection technology combined with unique hybrid polymers, to offer the ultimate in concrete protection. Proprietary, dual-action technology provides the ultimate in both penetrating and film-forming concrete protection. **BELLATRIX** offers environmentally friendly, VOC-compliant protection, which provides increased stain suspension and resistance against most contaminants found in kitchens, retail food stores, restaurants, malls, garages, warehouses, distribution centers, etc. **BELLATRIX** is formulated to be used in conjunction with **INDUROSHINE** to create a clear, high-gloss, dual-action concrete protection system after the grinding and polishing is complete.

LIQUI-HARD ULTRA concrete densifier and chemical hardener is a ready to use, colorless liquid, which hardens and dustproofs concrete at a molecular level. After proper application, the finished surface offers substantial improvement in abrasion and chemical resistance and will significantly improve the durability of the surface when compared to untreated concrete. As **LIQUI-HARD ULTRA** is applied and penetrates into the concrete surface, a chemical reaction takes place, producing a byproduct that fills in the pores of the concrete one molecule at a time. **LIQUI-HARD ULTRA** solidifies the concrete, eliminating dusting and pitting.

LIQUI-HARD ULTRA is chemically engineered to provide timely, quick, sustainable performance. The product is simply sprayed on, and then left moist on the surface for 20 minutes. In this short period of time, the colorless liquid quickly penetrates into the surface. Unlike traditional densifiers, **LIQUI-HARD ULTRA** does not require brushing into the surface or rinsing. After application, the resulting surface features enhanced protection and sheen, coupled with superior abrasion resistance. This environmentally safe, water-based product features a zero VOC content and provides an attractive option in green building applications. **LIQUI-HARD ULTRA** can be used instead of standard **LIQUI-HARD** when labor and time savings are required.

INDUROSHINE is supported by a network of approved applicators. Contact your local **W. R. MEADOWS** location for your local approved **INDUROSHINE** applicator.
