

# DECK-O-SEAL joint sealant

Seal all cracks and joints with DECK-O-SEAL two-part, elastomeric, polysulfide-based joint sealant. DECK-O-SEAL is used for caulking and sealing joints subject to concrete movement and provide a firm, flexible, weather-tight seal. It is ideal for sealing joints in and around swimming pools, and is applicable for both interior and exterior use. DECK-O-SEAL is highly resilient and has excellent recovery characteristics after extended periods of compression or elongation.

Try the complete system & see the **difference.**

DECK-O-SEAL also provides the industry with accessory products for the best in poolscape design, including DECK-O-DRAIN<sup>®</sup> drainage system, DECK-O-JOINT<sup>®</sup> vinyl expansion joint, and RENU-STRIP<sup>®</sup> expansion joint cap.

# DIFFERENCE

You've known and trusted the DECK-O-SEAL name as the best pool sealant available. However, we are much more than "just a sealant." Now DECK-O-SEAL offers a complete system to protect, enhance, and beautify your pool deck, walkway, or patio. DECK-O-SEAL has expanded to include wood-look plastic drains and joints as well as sealers used to seal your decks, copings, and waterfalls. Regardless of what your deck is - concrete, brick pavers, natural stone, or decorative concrete - we have a sealer to suit your needs. Try new DECK-O-SEAL systems and see the difference that top-quality products make.

## **DECK-O-GRIP** concrete deck cure and seal

Finish your project with confidence using DECK-O-GRIP non-yellowing, non-slip, acrylic cure and seal. DECK-O-GRIP is specifically designed to retain and enhance the appearance of concrete, decorative concrete, pavers, and exposed aggregate surfaces for years to come. The compound contains a slip-resistant additive, which establishes an easy-to-clean, non-slip surface for traditionally slippery areas. DECK-O-GRIP provides a glossy “wet look” and offers improved stain resistance.

## **DECK-O-SHIELD** concrete deck, waterfall and natural stone sealer

To ensure proper sealing on waterfalls and stone, use DECK-O-SHIELD™ waterfall and stone sealer as a water repellent for natural stone, concrete, and masonry surfaces. DECK-O-SHIELD weath-erproofs and protects virtually all waterfalls, decks, porches, patios, copings, and walkways around pools and helps resist stains and efflores-cence. Another advantage DECK-O-SHIELD provides is that the product will not alter the color or tint of the surface after application. A DECK-O-SHIELD treated surface will also inhibit the penetration of salts into the surface, reducing “whitening” or staining.

## **HS-1 SL** one-part, self-leveling, SMP-based sealant

HS-1 SL is a one-part, self-leveling hybrid sealant, developed with silyl-modified polymer (SMP) technology. It cures under the influence of atmospheric moisture to form a medium modulus sealant with excellent adhesive prop-erties and resistance to ageing and weathering.

HS-1 SL can be used in movement and contrac-tion joints. Ideal applications include indoor and outdoor pool decks subject to pedestrian traffic.

HS-1 SL is packaged in an easy-to-use 32 oz. pouch and is a one-component material. It is perfect for homeowner installs and is available in two colors - gray and tan.
