

# THE WAY TO MAKE OUR INFRASTRUCTURE INVESTMENTS LAST LONGER:

PENTREAT™ 244-100 from W.R. MEADOWS is no ordinary concrete sealer. It's a hydrophobic, impregnating sealer that helps prevent chloride-induced corrosion of rebar, scaling, spalling, freeze-thaw damage, and other causes of debilitating concrete. It penetrates deep. It requires no cleaning after application. And can be used on all types of concrete and masonry structures. Which means, no matter if you're pouring it or restoring it, PENTREAT can make your work last longer.

For more information, visit [www.wrmeadows.com](http://www.wrmeadows.com) or call 800.342.5976.
